Horizon Energy Systems offers a Sunpower Solar Electric System discount program for California Oak Creek and the Meadowlands neighborhoods of San Jose, CA

Horizon Energy Systems is offering a second round of a popular SunPower solar electric discount bulk-buy program for the Meadowlands and California Oak Creek neighborhoods in San Jose. By joining forces, homeowners in these two neighborhoods will be able to own a professionally installed, state of the art, SunPower solar system and enjoy pricing discounts through volume purchasing. As more people go solar, the savings increase.

This past winter Horizon Energy, along with SunPower Corp., offered a solar electric discount program. Thanks to enthusiastic Silver Creek residents, dozens of neighbors took advantage of the program and are now enjoying powering their homes with California sunshine. The program exceeded expectations. Participants were able to achieve the highest discount level using SunPower's highly efficient, aesthetically pleasing and maintenance free solar electric technologies.

The first round of the discount program in the Silver Creek area was a huge success. "The response and commitment of the residents to do the right thing and install solar power was amazing," comments Kurt Newick, Sales Director.

Marsha Kidd, one of the community organizers of this solar bulk-buy program states, "Working with Horizon Energy Systems was fantastic because of their knowledge of solar power installation and commitment in helping people to assess their needs and desires."

Two free meetings are scheduled to explain how neighbors working together can take advantage of this money saving opportunity to install solar power on their home.
